

## Lasso - Bug #10891

### Fix some build issues

11 mai 2016 18:06 - Nicolas Barbey

<b>Statut:</b>	Fermé	<b>Début:</b>	11 mai 2016
<b>Priorité:</b>	Bas	<b>Echéance:</b>	
<b>Assigné à:</b>	Nicolas Barbey	<b>% réalisé:</b>	0%
<b>Catégorie:</b>	Core	<b>Temps estimé:</b>	0:00 heure
<b>Version cible:</b>	2.6.1	<b>Planning:</b>	
<b>Patch proposé:</b>	Oui		
<b>Description</b>			
<p>The build fails if python points to version 3 instead of version 2 (due to the use of print "", import cStringIO, ... which are not compatible with python3).</p> <p>When configuring with --with-python=/usr/bin/python2 (in archlinux), the build still fails because the \$(PYTHON) variable is not used everywhere it need to be in the Makefile.am.</p> <p>Also, autoconf complains about += being used on an uninitialized EXTRA_DIST in docs/reference/lasso/Makefile.am.</p>			

### Historique

#### #1 - 28 juillet 2018 13:05 - Benjamin Dauvergne

- Statut changé de Nouveau à Solution déployée
- Version cible changé de future à 2.6.1

Your bug is fixed by the next 2.6.1 release.
