We can log a warning, but it's useless to return a Responder error to the requesting service provider as it is meaningless for it.

It produces such errors on django-mellon enabled sites:

```
unable to process a logout response ProfileStatusNotSuccessError()
Request repr():

Decoded SAML response is:

```

- Statut changé de Nouveau à Résolu (à déployer)

Corrigé coté mellon par:

```
commit aaedfde78674452b9e0d4d035a2cd4f24e2e6376
Author: Benjamin Dauvergne <bdauvergne@entrouvert.com>
Date: Mon Jun 20 17:42:17 2016 +0200
```

```
views: gracefully handle logout errors (fixes #11449)
```

plus d'actualité, authentic fait le job en retournant une erreur SAML.
