Description

When you install Authentic from scratch I have the following traceback :

```
[30/Dec/2011 11:27:08] "GET /login/?next=/ HTTP/1.1" 500 3798
Traceback (most recent call last):

```

This traceback hide another error because it's append when Authentic is trying to show an error page.

Historique

#1 - 02 janvier 2012 19:53 - Anonyme

When you say from scratch that is from the git repository or the 2.0.0 release tarball ?

It looks like a bad version for the "registration" application. As this application is now bundled with authentic maybe you have another version installed.

#2 - 11 janvier 2012 15:10 - Jérôme Schneider

- Priorité changé de Haut à Bas
- Version cible 2.0.1 supprimé

OK it was the django registration module. I installed the 1.8a1 and it's work. Why you don't use this registration module ? :
<http://dev.entrouvert.org/projects/authentic/repository/revisions/master/show/authentic2/vendor/registration>

#3 - 12 janvier 2012 01:17 - Benjamin Dauvergne

I do not understand your remark, 0.8.0-alpha-1 is the version already included in authentic source code.

#4 - 12 avril 2012 23:59 - Mikaël Ates

Can we close as not a bug ?

#5 - 13 avril 2012 10:34 - Benjamin Dauvergne

If everybody agrees that the problem does not exist anymore, we can close it. I've not done a from scratch installation for a long time.

#6 - 27 avril 2012 14:37 - Mikaël Ates

- Statut changé de Nouveau à Fermé

No traceback with install from scratch of release 2.0.1.
