Description			
Hello,			
According to the documentation "Attribute Management in Authentic 2", it's possible to add a LdapSource at the url :			
http://your.domain.com/admin/attribute_aggregator/ldapsource/add/			
It seems that with my default installation, this feature is not available. When I try to go on this url I have a 404 HTTP Error :			
[23/Mar/2012 09:57:21] "GET /admin/attribute_aggregator/ldapsource/add/ HTTP/1.1" 404			
The feature is not available for debug development version ? or is it a bug ?			
Regards

Hello,

Do you have python-ldap installed ?

Regards,

Mikaël

#2 - 23 mars 2012 14:51 - Arnaud Maillet

Hello,

Yep python-ldap is installed :

```
ii python-ldap          2.3.10-1ubuntu1          LDAP interface module for Python
```

I also use it as an authentication backend to bind a ldap directory.

Regards

That should be fixed now. There was a typo in the admin file of the attribute aggregator module. Can you confirm ?

#4 - 23 mars 2012 16:03 - Mikaël Ates

That should be fixed by the commit 9a39d233d6da8451a79e56c10d4c949400801ac7.

#5 - 23 mars 2012 16:09 - Arnaud Maillet

ok it works, thank you.
