

Authentic 2 - Bug #1317

Asks to consent for federation even with name id policy set to transient

27 mars 2012 12:36 - Frédéric Péters

Description			
When using a minimalistic SP, and a SP policy asking for transient nameids, Authentic 2.0.0 (from tarball) still asks the user to consent to a federation.			

Historique

#1 - 13 avril 2012 14:34 - Mikaël Ates

From the title of the demand, I understand that the user consent for federation should be asked even with transient nameIDs. It is currently missing and we can add this fonctionnality.

However, from the description, I understand that the user consent is asked with the transient nameID, what then seems to be a problem. What did I miss ?

#2 - 13 avril 2012 14:51 - Frédéric Péters

The bug is indeed that it asks for the consent, even with transient.

- Statut changé de Nouveau à Fermé

Fixed by commit 2edb7a305df40fd1df7be0335335c05dc556f25f.

#4 - 13 avril 2012 20:04 - Frédéric Péters

+ ""Do not ask consent for federation if a transient nameID is provided""

Note you shouldn't use string literals to comment the code, # exists for that purpose.
