Catégorie:	Temps estimé: 0:00 heure
Version cible:	Planning:
Patch proposed:	
Description	
<p>It should be possible to create connectors that can propagate changes to the directory to other directories (LDAP for example). A first step would be to have signals to intercept modifications, five would be needed:</p> <ul style="list-style-type: none">• principal_created, accompanying attributes (principal,)• principal_deleted, accompanying attributes (principal,)• attribute_created, accompanying attributes (principal, attribute,)• attribute_deleted, accompanying attributes (principal, attribute,)• relation_created, accompanying attributes (object, predicate, value,)• relation_deleted, accompanying attributes (object, predicate, value,)
