

Authentic 2 - Development #14452

manager: uniform behaviour to edit/delete objects

28 décembre 2016 19:58 - Frédéric Péters

Statut:	Fermé	Début:	28 décembre 2016
Priorité:	Normal	Echéance:	
Assigné à:	Benjamin Dauvergne	% réalisé:	0%
Catégorie:	BO	Temps estimé:	0:00 heure
Version cible:		Planning:	Non
Patch proposed:	Non		
Description			
Currently, for editing:			
<ul style="list-style-type: none">organizational units: a click in the list opens a popup to edit the object.users: a click in the list opens a new page with the edit form.roles: a click in the list opens a new page displaying details and a top right link to edit (in a popup).services: a click in the list opens a new page displaying details and a bottom left button to edit (in a popup).			
And for deleting:			
<ul style="list-style-type: none">organizational units: the list has a delete column, with an icon, this opens a html popup to confirm.users: a click in the list opens a new page with the edit form and a set of action buttons on the right, clicking the "delete" button opens a js popup to confirm.roles: a click in the list opens a new page displaying details, and a top right link to delete, this opens a html popup to confirm.services: a click in the list opens a new page displaying details, there's no way to delete the object.			
I'd suggest to unify behaviour on the "roles" one:			
<ul style="list-style-type: none">a click in the list opens a new page displaying details and a top right link to edit (in a popup unless the form is too long (users)).a click in the list opens a new page displaying details, and a top right link to delete, this opens a html popup to confirm.

Historique

#2 - 06 mars 2017 09:52 - Mikaël Ates

- Tracker changé de Bug à Development

#4 - 12 janvier 2022 18:06 - Benjamin Dauvergne

- Statut changé de Nouveau à Fermé

- Planning mis à Non

C'est uniforme maintenant, on a trois permissions search, view et edit pour le listing, la page de détail et la page d'édition.
