

Fargo - Bug #22717

corrections diverses dans le module OAuth2

21 mars 2018 20:58 - Benjamin Dauvergne

Statut:	Fermé	Début:	21 mars 2018
Priorité:	Normal	Echéance:	
Assigné à:	Benjamin Dauvergne	% réalisé:	0%
Catégorie:		Temps estimé:	0:00 heure
Version cible:	0.25	Planning:	
Patch proposé:	Oui		
Description			
<ul style="list-style-type: none">• messages non localisés• typo• logique manquante (suppression systématique du document temporaire)• changement du modèle OAuth2TempFile qui sert de sas: on ne bloque pas plusieurs PUT du même fichier, et donc on utilise plus le hash du fichier comme clé primaire, on génère un uuid nouveau à chaque fois• ajout de plein de logs• ajout d'un lien des autorisations et des documents temporaires vers le modèle du client qui en est responsable

Révision 2fe7382a - 21 mars 2018 23:53 - Benjamin Dauvergne

oauth2: improve coding style (#22717)

- declare all views with `.as_view()`
- add helper `make_url()` to properly add parameters to query string of `redirect_uri`
- stop threading the `redirect_uri` through the session
- make POST form target implicit, so that parameters are kept
- do checks in `dispatch()` to share them between POST and GET methods

Révision 59ec2bea - 22 mars 2018 21:15 - Benjamin Dauvergne

oauth2: do not use the document hash as primary key for temp files (#22717)

It prevents a client from pushing the same file multiple times, which makes temporary errors harder to handle (client would have to handle a failure from the web-service). We allow any number of push of the same document, orphans will be cleaned up by a background task, and storage is not duplicated as document are deduplicated through their hash.
