#### Description

parce que sinon, par exemple sur le cron qui rafraichit les caches, en cas de soucis SSL, on se retrouve avec des mails d'alerte tels que :

```
combo.apps.wcs: error: HTTPSConnectionPool(host='wcs.dev.publik.love', port=443): Max retries exceeded with url: /api/categories/?orig=combo.dev.publik.love&algo=sha256&timestamp=2019-03-14T20%3A03%3A57Z&nonce=7b098ae5063f96bd6ad7c67897f75fefL&signature=DMAREPcVKl%2B8YJCJ4s7m769J1DrXd1DMEqIjau66HXBo%3D (Caused by NewConnectionError('<urllib3.connection.VerifiedHTTPSConnection object at 0x7fbaa7012310>: Failed to establish a new connection: [Errno 111] Connection refused',))
```
