

w.c.s. - Bug #32424

crash quand restauration d'un brouillon sur sa page de validation et qu'un champ "tableau de longueur variable" a entretemps été ajouté

17 avril 2019 15:42 - Frédéric Péters

Statut:	Fermé	Début:	17 avril 2019
Priorité:	Normal	Echéance:	
Assigné à:	Frédéric Péters	% réalisé:	0%
Catégorie:		Temps estimé:	0:00 heure
Version cible:		Planning:	Non
Patch proposed:	Oui		

Description

Exception:

```
type = '<type 'exceptions.AssertionError'>', value = 'value 'f3' not a list: got '''
```

misc: don't crash restoring unset table with rows field (#32424)

Historique

#1 - 17 avril 2019 16:08 - Frédéric Péters

- Fichier 0001-misc-don-t-crash-restoring-unset-table-with-rows-fie.patch ajouté

- Statut changé de Nouveau à Solution proposée

- Patch proposed changé de Non à Oui

```
- value = dict.get(field.id, '')
```

```
+         value = dict.get(field.id)
```

Je suis remonté dans l'historique pour voir quand " aurait été ajouté, en imaginant que ça a pu corriger quelque chose à un moment, qu'il y aurait un message de commit, un ticket, que sais-je.

Mais c'était comme ça dès le premier commit :

```
+     def create_view_form(self, dict = {}):  
+     ...  
+         form.add(widget_classes[field['type']], "f%d" % i, title = field['name'],  
+                 readonly = "readonly", value = dict.get(field['name'], ''), **kwargs)
```

Tous les tests passent etc.

#2 - 20 avril 2019 08:09 - Frédéric Péters

(il faudrait celui-ci dans la prochaine mise à jour)

#3 - 23 avril 2019 11:20 - Thomas Noël

- *Statut changé de Solution proposée à Résolu (à déployer)*

```
commit 520a34c0ac7a6d04c0a19ef31f5b742dda7b0973  
Author: Frédéric Péters <fpeters@entrouvert.com>  
Date:   Wed Apr 17 15:59:17 2019 +0200
```

```
misc: don't crash restoring unset table with rows field (#32424)
```

#4 - 23 avril 2019 12:15 - Frédéric Péters

- *Statut changé de Résolu (à déployer) à Solution déployée*
