

Authentic 2 - Bug #4191

setup.py seems to be broken with pip 1.5

03 janvier 2014 11:20 - Thomas Noël

| Description | |
| pip 1.4.1 : | |
| <pre>\$ pip install authentic2 ... Successfully installed authentic2 django south requests django-registration django-admin-tools dja ngo-debug-toolbar sqlparse</pre> | |
| but with pip 1.5 : | |
| <pre>\$ pip install authentic2 ... Downloading/unpacking django-registration==0.8.0final (from authentic2) Could not find a version that satisfies the requirement django-registration==0.8.0final (from au thentic2) (from versions: 0.7, 0.8, 1.0) Some externally hosted files were ignored (use --allow-external to allow). Cleaning up... No distributions matching the version for django-registration==0.8.0final (from authentic2) Storing debug log for failure in /home/thomas/.pip/pip.log I've tried new pip options (--allow-external, --allow-unverified, --allow-all-external) without success.</pre> | |

- Statut changé de Nouveau à Fermé

It's fixed, we do not depend on a specific version anymore.
