misc: completely remove use of allow_lazy (#42694)

allow_lazy(func, *resultclass) signature differs from keep_lazy(*resultclasses)(func) signature but it was replaced without any regard to this difference and it broke AttributeAdmin as attribute kinds labels use a lazyfied capfirst() function.

Révision a35be9f2 - 12 mai 2020 23:55 - Benjamin Dauvergne

admin: force is_locked() to False in UserChangeForm (#42694)

Locked fields are implemented by renaming the form's fields with a '@disabled' suffix. But it interacts badly with the Django admin framework which expects all fields to always exist. The simplest fix for that is to disable field locking in the admin views on User.
