    response = handle_uncaught_exception(request, get_resolver(get_urlconf()), sys.exc_info())
/tmp/tox-paul/authentic/authentic-py3-djl11-drf34/lib/python3.8/site-packages/django/core/handlers
/exception.py:41: in inner
    response = get_response(request)

```

Versions de lasso installées :

```

liblasso3/unstable,testing,now 2.6.1-1 amd64 [installé]
  Library for Liberty Alliance and SAML protocols - runtime library

liblasso3-dev/unstable,testing,now 2.6.1-1 amd64 [installé]
  Library for Liberty Alliance and SAML protocols - development kit

python-lasso/stable,now 2.6.0-2+b2 amd64 [installé]
  Library for Liberty Alliance and SAML protocols - Python bindings

python3-lasso/unstable,testing,now 2.6.1-1 amd64 [installé]

```

Historique

#1 - 18 juillet 2020 16:10 - Paul Marillonnet

Est-ce tout simplement parce que ~~l'issue~~ python3-lasso ne supporte pas encore python dans sa version 3.8 ou supérieure ?

#2 - 18 juillet 2020 16:27 - Benjamin Dauvergne

Je ne vois rien sur jenkins, on parle de quoi là ?

#3 - 18 juillet 2020 16:36 - Paul Marillonnet

Pardon, pas précisé, trace en local en tournant les tests avec tox.

#4 - 28 juillet 2020 10:48 - Benjamin Dauvergne

Tu pourrais tester avec un lasso compile depuis [#44287](#) voir si ça change quelque chose pour toi ? Je suis parti sur ces modifications pour que ça tourne chez moi en local justement sur un mélange de testing/unstable.

#5 - 24 janvier 2024 12:59 - Benjamin Dauvergne
