

Lasso - Development #46

Add a way to verify SubjectConfirmationData->Recipient with the URL of the assertionConsumer

21 May 2010 10:14 PM - Benjamin Dauvergne

Target version:	future	Planning:	
Patch proposed:			
Description			
We need helper API to validate this field with the value given by the SP AssertionConsumer handler for its URL.			

History

#1 - 27 Jul 2010 10:56 AM - Benjamin Dauvergne

- Category set to SAMLv2
- Target version changed from future to 2.4.0

The basic API could have this form

```
LassoSaml2AssertionValidationState lasso_subject_confirmation_data_check_recipient(LassoSaml2SubjectConfirmationData *subject_confirmation_data, const char *recipient);
```

a simpler to use API would also be defined on LassoSaml2Assertion:

```
LassoSaml2AssertionValidationState lasso_saml2_assertion_check_scd_recipient(LassoSaml2Assertion *assertion, const char *recipient);
```

#2 - 03 Sep 2015 04:45 PM - Benjamin Dauvergne

- Target version changed from 2.4.0 to future
