Version cible:	2.6.0	Planning:	
Patch proposé:	Non		
Description			
<p>I have an IDP that is submitting SAML Responses to an SP built with Lasso (mod_auth_melon). This IDP uses the http://www.w3.org/2001/10/xml-exc-c14n#WithComments canonicalization format which doesn't seem to be specified anywhere in your code base. This causes validation errors.</p> <p>If http://www.w3.org/2001/10/xml-exc-c14n#WithComments is supported can you tell me how to utilize it? If not, can you consider adding support for it?</p>			

Révisions associées

Révision 1194b3e6 - 06 mars 2016 13:45 - Benjamin Dauvergne

add support for C14N 1.1 methods and C14N withComments methods (fixes #4863)

- Version cible mis à future

#2 - 03 septembre 2015 17:02 - Benjamin Dauvergne

Is it still useful for you ? Which implementation is requiring that canonicalization method ?

We worked around this in our IDP some time ago.

If you think others would find it useful feel free to add the feature whenever you get around to it. Otherwise, feel free to close the ticket.

The specification mandate support for <http://www.w3.org/2001/10/xml-exc-c14n#WithComments> so I added it, I also added new ones from the C14N 1.1 standard.
