Description

Vu sur le build d'un commit qui ne touchait pas au migration, c'est revenu à la normale en relançant :

```
py3-django111-pylint-coverage.tests.test_sql.test_migration_12_users_fts (from (junit.xml)) :
```

Message d'erreur

```
AssertionError: assert True is False
 + where True = <function guard_postgres.<locals>.f at 0x7f13fe14a488>('user', conn=<connection object at 0x7f13f9342ae8; dsn: 'dbname=wcstests11176 user=jenkins', closed: 0>, cur=<cursor object at 0x7f13f94f17c8; closed: 0>)
 +     where <function guard_postgres.<locals>.f at 0x7f13fe14a488> = sql.is_reindex_needed
```

Pile d'exécution

```
@postgresql
def test_migration_12_users_fts():
    conn, cur = sql.get_connection_and_cursor()
    cur.execute('UPDATE wcs_meta SET value = 11 WHERE key = %s', ('sql_level',))

    sql.SqlUser.wipe()

    user = sql.SqlUser()
    user.name = 'Pierre'
    user.store()

    # remove the fts column
    cur.execute('ALTER TABLE users DROP COLUMN fts')
    assert not column_exists_in_table(cur, 'users', 'fts')
    sql.migrate()

    assert column_exists_in_table(cur, 'users', 'fts')
    assert migration_level(cur) >= 12

    # no fts, migration only prepare re-index
    assert len(sql.SqlUser.get_ids_from_query('pierre')) == 0
