Description

<https://jenkins.entrouvert.org/job/publik-devinst-wip/job/wip%252F59823-hostname/1/console>

Se reproduit facilement dans un venv tout frais en désactivant le cache pip (qui est vide sur un container tout frais je suppose) :

misc: use suds package in pure python installation (#60550)

Instead of suds-jurko that is not maintained anymore.

In bookworm the package is based on <https://github.com/suds-community/suds> which we start using here.
