

UnivNantes (historique) - Bug #6164

Log level handling in sync-metadata.py

17 décembre 2014 10:23 - CRIMA CRIMA

Statut:	Rejeté	Début:	17 décembre 2014
Priorité:	Bas	Echéance:	
Assigné à:		% réalisé:	0%
Catégorie:	SP (pffedportal)	Temps estimé:	0:00 heure
Version cible:		Planning:	
Patch proposed:	Non		
Description			
Hi,			
When I was trying to troubleshoot a problem with Univnantes's SP metadata refereshing, I hit something that seems unintentional about log verbosity.			
I ran manually this sequence in a root bash shell :			
<pre>cd /usr/local/univnantes/pffedportal MD=/var/db/metadata-idps.xml VIRTUAL_ENV="/usr/local/univnantes" export VIRTUAL_ENV PATH="\$VIRTUAL_ENV/bin:\$PATH" export PATH python ./manage.py sync-metadata --source="federation" --idp --verbosity=3 \$MD</pre>			
Expected behavior :			
On stdout, messages like (variable replaced...) :			
Creating %(what)s %(name)s, %(id)s			
and			
Updating %(what)s %(name)s, %(id)s			
Actual Behavior :			
No output except the fatal error that I am tracking.			
(Work as expected if --verbosity=2)			
(Dumb) patch attached.			

Historique

#1 - 09 mars 2015 13:10 - Benjamin Dauvergne

- Statut changé de Nouveau à Rejeté
- Patch proposed changé de Oui à Non

These concerns have been addressed in the upstream package but as univnantes architecture is changing current code is not going to be updated.
