

## Authentic 2 - Bug #7206

### sekizai is impossible to deal with theming-wise

12 mai 2015 09:03 - Frédéric Péters

<b>Version cible:</b>	2.1.20	<b>Planning:</b>	
<b>Patch proposed:</b>	Oui		

**Description**

The insistance of sekizai templatetags to be declared in the top template makes authentic theming quite a pain; e.g. you cannot do:

```
{% extends 'theme/common.html' %}
{% block extra-head %}
{% render_block "css" %}
{% render_block "js" %}
{% endblock %}
```

#### Historique

##### #1 - 12 mai 2015 17:07 - Benjamin Dauvergne

Are you sure it does not work or are you quoting the documentation ? It seems to me that the way authentic uses sekizai it should work.

The principle of sekizai is to set a dictionary in a context variable before template rendering and during rendering the dictionary is filled by subtemplates.

I think that this behaviour is broken if you put the render\_block and addtoblock tag in different blocks of the same template as I think you cannot be sure of the ordering of the rendering. But that is not how authentic use sekizai, we begin by rendering subtemplates for the different authentication frontend class, then we pass the rendered blocks to the final template of the login view. Maybe in this case it still works.

##### #2 - 12 mai 2015 18:25 - Frédéric Péters

I tried and it didn't work, for sure. But I set this ticket as low priority, so this can be discussed when we have more time on our hands.

##### #3 - 14 mai 2015 22:40 - Benjamin Dauvergne

- Fichier 0001-templates-remove-sekizai-tags-and-rename-base.html.patch ajouté

- Assigné à mis à Benjamin Dauvergne

- Version cible mis à 2.1.20

- Patch proposed changé de Non à Oui

##### #4 - 14 mai 2015 22:51 - Frédéric Péters

The attached patch is about fargo, not authentic.
