<b>Description</b>			
It should also be possible to generate a password and to send the new password by mail to the user.			

#### Révisions associées

##### Révision 44d27ffa - 18 mai 2015 16:50 - Benjamin Dauvergne

utils: add a send templated mail function

It takes an email or an user as first argument then a template name prefix then a context dictionnary. the following templates are used:

- <prefix>\_subject.txt
- <prefix>\_body.txt
- <prefix>\_body.html

By default if an HTML template is found, it is used to add an HTML version of the mail. refs #7248.

##### Révision 2133b18b - 18 mai 2015 16:50 - Benjamin Dauvergne

passwords: add a function to generate password

It can only accomodate A2\_PASSWORD\_POLICY\_MIN\_LENGTH and A2\_PASSWORD\_POLICY\_MIN\_CLASSES, it is not possible currently to generate something that will match A2\_PASSWORD\_POLICY\_REGEX with certainty. It would need to generate a transducer from the regular expression. refs #7248.

##### Révision 25ad9166 - 18 mai 2015 22:22 - Benjamin Dauvergne

manager: rewrite manager using RBAC for authorization and limiting view of models

Also add page to manage organizational units and roles.
