0001: J'ai isolé l'erreur.

La correction est donnée dans <https://dev.entrouvert.org/issues/65763>

Je ne l'ai d'abord pas compris, ce qui a donné suite à beaucoup de tickets pour valider les paramètres issus des référentiels, dont on aurait pu se passer, mais qui a quand même permis de clarifier certains messages d'erreurs.

En l'activant (0002), on fait crasher l'encodeur json sur du contenu XML qui apparaît dans un champ "detail" de l'exception.

Ce que répare 0003, en prenant en compte le nouveau champ "detail".

#6 - 18 janvier 2023 17:13 - Robot Gitea

Nicolas Roche (nroche) a ouvert une pull request sur Gitea concernant cette demande :

- URL : <https://gitea.entrouvert.org/entrouvert/passerelle/pulls/45>
- Titre : toulouse-maelis: update soap error in functests (#73567)
- Modifications : <https://gitea.entrouvert.org/entrouvert/passerelle/pulls/45/files>

#7 - 18 janvier 2023 17:14 - Nicolas Roche

- Lié à Bug #73567: toulouse-maelis: mise à jour des tests fonctionnels ajouté

#8 - 18 janvier 2023 17:17 - Nicolas Roche

Je ne comprends pas pourquoi la PR 45 est arrivée ici (en plus que dans #73567). Peut-être parce que j'ai fait référence à ce ticket dans le message de la PR ?

#9 - 18 janvier 2023 17:43 - Benjamin Dauvergne

La PR 45 est référencée parce que tu références ce ticket dans un commentaire. Je préférerais que tu revert et qu'on corrige cette histoire de dict modifié.
