<b>Version cible:</b>	2.2.0	<b>Planning:</b>	
<b>Patch proposed:</b>	Non		
<b>Description</b>			
In the management interface I had a user that was not attached to an entity, I was trying to change one of the attributes but couldn't submit the form as there was no entity, and the entity field was marked disabled and readonly, so I couldn't even select the default entity.			

### Révisions associées

#### Révision 7cd1455a - 19 juillet 2015 00:53 - Benjamin Dauvergne

manager: remove disabledness of the entity field in user creation form for superusers (fixes #7861)

It also fixes usability problems for administrator of one or many entities.

#### Révision dd358770 - 19 juillet 2015 00:54 - Benjamin Dauvergne

manager: improve test on user creations (#7861)

### Historique

#### #1 - 16 juillet 2015 11:56 - Frédéric Péters

Worse, for a user that had entity set to the default entity, the form would not validate either, as the entity was not submitted (because the select was disabled).

#### #2 - 17 juillet 2015 13:24 - Benjamin Dauvergne

I think the rules for adding/editing an user should be:

User status \ Number of entities	1	many
superuser	Can add/edit an user with or without an entity (entity field not required)	
administrator of users in 1 entity	New/Edited user is automatically in the only visible entity, entity field is read-only	
administrator of users in many entities	Cannot happen	administrator must select one entity in the one he administrates

I'll define test cases following these rules.
