

## Authentic 2 - Development #7879

When an authnrequest is canceled, statusMessage should contain a message telling what happened.

### History

#### #1 - 20 July 2015 06:59 PM - Benjamin Dauvergne

- Related to Bug #7878: Erreur lors de l'annulation d'une tentative de SSO added

#### #2 - 05 October 2015 05:17 PM - Benjamin Dauvergne

In response messages of the SAML protocol there is a part called the Status (an XML element), it contains an unique element the StatusCode which is usually success (see [https://www.samltool.com/generic\\_sso\\_res.php](https://www.samltool.com/generic_sso_res.php) for an exemple). When the statuscode is not success, it can be accompanied by another element named "StatusMessage" which is a freeform message intended to the user. Currently we do not set such a message when we return a not success error (for example if the user select "cancel" instead of login in).

Points where not succes is returned by authentic must be found (in authentic2/idp/saml2/saml2\_endpoints.py) and a statusmessage should be set using a translatable string (lasso expect UTF-8 strings, so the string must be encoded before being set in login.response.status.statusMessage).

#### #3 - 08 October 2015 11:25 AM - Josué Kouka

- File 0001-Status-message-added-when-user-refuse-to-consent-or-.patch added

- Status changed from Nouveau to En cours

- Patch proposed changed from No to Yes

**statusMessage** added when user **refuses to consent or cancel the login process**

#### #4 - 08 October 2015 11:59 AM - Josué Kouka

- File 0001-7879-adding-translation-to-SAML-response-statusMessa.patch added

- Patch proposed changed from Yes to No

translation added

#### #5 - 08 October 2015 02:45 PM - Benjamin Dauvergne

I forgot that set\_saml2\_response\_responder\_status\_code did already handle this, good catch.

This line is erroneous:

```
_('User canceled login process').decode('utf-8'))
```

you must encode and not decode, and it must be done after getting the translated string, like this:

```
_('msg').encode('utf-8')
```

Also I would prefer only one patch for these changes (use git rebase), but with one more patch for the translations (do makemessages, then modify src/authentic2/saml/locale/fr/.../django.po to translate both strings).

**#6 - 09 October 2015 10:12 AM - Josué Kouka**

- File 0001-7879-fixing-status-message-encoding-and-adding-trans.patch added

**#7 - 09 October 2015 10:20 AM - Benjamin Dauvergne**

Ok, par contre on a pour habitude de séparer les patches au code et aux fichiers des traductions, les patches aux fichiers de traductions on les nomme générale "update french translation" ou "update translations".

**#8 - 09 October 2015 11:24 AM - Josué Kouka**

- File 0001-7879-statusMessage-in-SAML-Response-and-tests-added.patch added

- File 0001-7879-update-french-translation.patch added

It should be ok now

**#9 - 11 October 2015 11:42 AM - Frédéric Péters (de retour le 10/10)**

- Patch proposed changed from No to Yes

**#10 - 11 October 2015 11:44 AM - Frédéric Péters (de retour le 10/10)**

De mon côté, je suggérerais que le .encode('utf-8') soit placé à l'intérieur de set\_saml2\_response\_responder\_status\_code().

**#11 - 11 October 2015 11:07 PM - Benjamin Dauvergne**

Ok avec ça, il manque un test sur le consentement.

**#12 - 12 October 2015 11:39 AM - Benjamin Dauvergne**

- Assignee changed from Benjamin Dauvergne to Josué Kouka

**#13 - 09 March 2016 10:17 AM - Benjamin Dauvergne**

- Related to Project management #10245: Gérer les autorisations de se connecter à un service dans authentic added

**#14 - 17 November 2017 02:25 AM - Benjamin Dauvergne**

- Patch proposed changed from Yes to No

Il manque toujours un test sur le consentement (ouais c'est chiant d'avoir à faire des tests qui devraient être là :)).

**#15 - 06 July 2019 10:14 PM - Frédéric Péters (de retour le 10/10)**

- Assignee deleted (Josué Kouka)
