<b>Description</b>			
The function expose lasso_provider_verify_signature() is currently not exposed in the symbol table. As projects like crudesaml ( <a href="http://ftp.espci.fr/pub/crudesaml/README">http://ftp.espci.fr/pub/crudesaml/README</a> ) uses this function it would be nice to expose it. The attached patch does this.

Did you test your patch ? It seems to me that for supporting the xmlDoc type in the bindings (there are more than one, your patch lacks Perl, Java and PHP support) a lot more has to be done. There should be at least a conversion function from string to xmlDoc (as there is one from string to xmlNode).

I changed from the attached patch to the patch from <http://www.sogo.nu/bugs/view.php?id=2958>:

To integrate this patch I'll need to know the author and he must state that the patch is contributed under the MIT license (it's our policy to keep our capacity to relicense Lasso).

Yes, I can't speak french but from what <https://wiki.auf.org/wikiteki/Projet/SOGo/TestsSAML?action=info> says it seems the patch is created by <https://wiki.auf.org/wikiteki/MoussaNombr%C3%A9?action=show&redirect=MoussaNombre>  
I send a message to this email address hoping that it exists and he/she will release the patch under MIT license.

#### #8 - 19 février 2016 10:46 - Benjamin Dauvergne

- Version cible changé de 2.5.1 à future

#### #9 - 19 février 2016 10:48 - Florian Best

Nobody is answering, it seems not possible to contact the owner of the patch. Is it really a so hard issue to just "reimplement" these some lines?

#### #10 - 19 février 2016 11:14 - Benjamin Dauvergne

Maybe not, try it :)

#### #11 - 09 septembre 2019 15:31 - Benjamin Dauvergne

- Statut changé de Nouveau à Fermé

**#12 - 09 septembre 2019 15:33 - Florian Best**

Please reopen this issue.

**#13 - 09 septembre 2019 15:35 - Benjamin Dauvergne**

No there is no code we can use here, come back with some usable code and reopen an issue.
