

Authentic 2 - Development #8280

Improve UI for managing roles and users

16 Sep 2015 03:29 PM - Benjamin Dauvergne

Status:	Fermé	Start date:	16 Sep 2015
Priority:	Normal	Due date:	
Assignee:	Benjamin Dauvergne	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2.2.0	Planning:	No
Patch proposed:	No		

Description

- align user listing columns to the left
- replace link on user.uuid to link on the user name
- remove the user date joined column
- order the user table by user full name
- reorder columns of the user table
- factorize the search form template
- ignore ordering of terms and columns when searching user
- add view of organizational units to all managers
- remove dead extra_scripts block
- rename roles table name column to "label"
- change verbose name of members_counts in roles tables to "member count"
- hide users' table ou column when there can be only one
- add view of organizational units to all managers
- on user's role page: show user's roles form her ou by default
- when an ou is selected all roles of this ou are shown, and selection is done through checkboxes instead of a django-select2 selector fixes [#8140](#))
- all search forms are now ajax loaded (but the search button has been kept, in case..), for free text search loading starts 600ms after the last user keypress (no need to leave the input field),
- when a role is inherited but the user is not directly a member of it, an indeterminate checkbox representation is used;
- proper history is maintained for the browser back button to work, even the state of the search form is restored; it also improves navigation using the pagination links (which were already loaded using ajax).
- align "add role" link to the right
- hide slug field on edit role form
- normalize labels and fix appbars for ous and roles
- normalize untranslated section names
- align role's members table on user's table
- add direct management of role children and parents on the role members page
- remove slug field from ou edit page
- renamed ou.name field label to "Label"

Revision 87a5e5c2 - 17 Sep 2015 01:56 PM - Benjamin Dauvergne

manager: ignore ordering of terms and columns when searching a user (#8280)

Terms are splitted and each term generate list of filters which are ORed. Then all filter groups by term are ANDed.

Revision bb1cd294 - 17 Sep 2015 01:56 PM - Benjamin Dauvergne

manager: remove dead extra_scripts blocks (#8280)

It's dead because the block name in the gadjo base template is extrascripts and non of the form use the Media declaration.
